RUBY RED SALES & SERVICES

WEBSITE DEVELOPMENT PROPOSAL

PROJECT OBJECTIVE

Develop a complete, professional and responsive digital commerce website for Ruby Red Sales & Services. The website will support existing B2B/bulk customers while creating a clear online ordering experience for new retail customers arriving through social media and other digital channels.

1. WEBSITE & UI/UX

- Modern, clean and professional website design aligned with Ruby Red's brand and product range.
- Fully responsive layout for desktop, tablet and mobile devices.
- Clear navigation structure with product categories and customer-focused calls to action.
- Homepage with featured products, categories, promotional sections and ordering access.
- Dedicated About Us, Contact and business information sections.
- Mobile-friendly product and ordering experience.

2. PRODUCT CATALOGUE

- Product categories and sub-categories.
- Product listing pages with images, names, descriptions and availability information.
- Product detail pages with complete product information.
- Product search and basic filtering.
- Featured / popular product sections.
- Easy product and category management through the admin panel.

3. CUSTOMER & ORDERING FEATURES

- Customer registration and secure login.
- B2B / bulk customer ordering for existing business customers.
- B2C retail ordering for individual customers.
- Shopping cart with quantity management.
- Checkout and order placement.
- Order confirmation and order history.
- Basic customer profile management.
- Quick access to WhatsApp / direct contact for customer communication.

4. ADMIN PANEL

- Admin dashboard for centralized website operations.
- Product management: add, edit, update and deactivate products.
- Category management.
- Customer management.
- B2B and B2C order management.
- Order status management and basic fulfillment tracking.
- Basic inventory / product availability management.
- Website content management for key sections.
- Basic sales / order overview and reporting.

5. DIGITAL & SOCIAL INTEGRATION

- WhatsApp / direct contact integration.
- Social media links and integration points.
- Social-media-friendly product and landing pages.
- Campaign-ready URLs for traffic from Instagram, Facebook, TikTok and other channels.
- Basic SEO-ready website structure and metadata setup.

6. PROPOSED TECHNOLOGY STACK

- **Frontend:** React.js / Next.js for a fast, modern and SEO-friendly web experience.
- **Backend:** Node.js with Express.js for secure API and business logic.
- **Database:** PostgreSQL for structured customer, product and order data.
- **Admin:** React / Next.js based web administration panel.
- **Authentication:** Secure session / token-based authentication with role-based access.
- **API:** RESTful API architecture for website and future mobile / third-party integrations.

7. CLOUD & DEPLOYMENT

- **Cloud Hosting:** Production deployment on a reliable cloud environment such as AWS / Google Cloud, finalized during technical setup.
- **Database Hosting:** Managed PostgreSQL service where appropriate.
- **File Storage:** Cloud object storage for product images and uploaded assets.
- **CDN:** Content delivery layer for faster image and static asset delivery.
- **Security:** HTTPS/SSL, environment-based secrets, access control and secure API configuration.
- **Backup:** Regular database / application backup strategy based on the selected cloud environment.
- **Monitoring:** Basic application and server monitoring for production stability.

8. DELIVERY TIMELINE

- **Overall timeline: 6 weeks.**
- **Week 1:** Requirement finalization, sitemap, technical planning and UI/UX direction.
- **Weeks 2–3:** Website frontend, product catalogue and customer-facing functionality.
- **Weeks 3–4:** Backend APIs, database, customer ordering and admin panel.
- **Week 5:** Integration, testing, responsive optimization and corrections.
- **Week 6:** Final QA, deployment, handover and launch support.

9. PAYMENT & MILESTONES

- **Milestone 1 — \$400:** Project start, requirement finalization, sitemap, UI/UX and initial website structure.
- **Milestone 2 — \$400:** Core website development, product catalogue, customer ordering, backend and admin functionality.
- **Milestone 3 — \$400:** Final development, testing, corrections, deployment and project handover.
- Each milestone will be delivered and reviewed according to the corresponding payment stage.

TOTAL PROJECT INVESTMENT	\$1,200
---------------------------------	----------------

10. 3-MONTH POST-LAUNCH SUPPORT

- **3 months of post-launch support service are included.**
- Bug fixing for functionality delivered within the approved project scope.
- Support for deployment-related issues and reasonable production troubleshooting.
- Minor configuration assistance related to the delivered website.
- New features, major changes, third-party service charges or out-of-scope development will be estimated separately.

11. WORKING TERMS

- Client will provide required business information, product data, images, branding materials and third-party account access where applicable.
- Client feedback and approvals should be provided in a timely manner to maintain the agreed 6-week schedule.
- Third-party provider charges, payment gateway fees, cloud charges and domain/hosting fees are separate unless specifically agreed otherwise.
- Any functionality outside the approved scope will be discussed and approved before implementation.
- Final source-code / deployment handover will follow completion of the agreed milestones and final payment.

NEXT STEP

Once the proposal is approved, GS3 Solution LLC will finalize the requirements, confirm the website structure and begin the first milestone.
